Nexus
AML INVESTIGATION & INTELLIGENCE PLATFORM

Enterprise | AI-Powered | FinCEN Ready

Intelligence-grade AML Investigation & Governance

Nexus empowers financial crime compliance teams at banks and financial institutions to monitor, investigate, and govern anti-money laundering risks at scale — with advanced AI, real-time network analysis, and a fully auditable investigation workflow.

PLATFORM MODULES

Six Integrated Compliance Modules

Operations Dashboard

Live KPI monitoring with AI-generated insights, trend analysis, and analyst workload overview — all in one real-time hub.

Alert Monitoring

Risk-stratified alert queue with advanced filtering, bulk triage, and full audit trail. Supports Open, In Progress, and Closed lifecycle states.

Investigation Workbench

End-to-end case investigation with timestamped notes, evidence tagging, AI-generated SAR narratives, and one-click SAR export.

Graph Intelligence

Multi-cluster transaction network visualization. Detects circular flows, structuring rings, and sanctions proximity across 26-node networks.

Enhanced Due Diligence

Automated EDD case management with review scheduling, overdue tracking, AI-generated EDD reports, and critical case escalation.

Team Workload

Analyst capacity dashboard with real-time case counts, bulk reassignment, and workload balancing across the compliance team.

AI INTELLIGENCE LAYER

Powered by GPT-4o — Designed for Compliance

AI-Generated SAR Narratives

GPT-4o drafts complete, FinCEN-compliant Suspicious Activity Report narratives from case data — reducing manual writing time by up to 80%.

Live Dashboard Intelligence

Real-time AI analysis of alert patterns, risk concentrations, and investigation backlogs. Fingerprint-cached to eliminate redundant API calls.

Network Intelligence Reports

One-click SAR-ready cluster narratives for each investigation network — covering subjects, transaction flows, risk indicators, and recommended actions.

REAL-TIME DATA INTEGRATION

Sentinel API Integration

Nexus connects natively to upstream Transaction Monitoring Systems (TMS) via the Sentinel REST API. One-click sync imports customers, alerts, transactions, and graph network data in real time.

KEY API ENDPOINTS

POST `/sync/sentinel`
Full data ingestion from Sentinel TMS

GET `/api/kpis`
Live dashboard metrics & EDD stats

GET `/api/graph-data`
Network graph with cluster metadata

POST `/api/graph/cluster-report`
AI SAR narrative per cluster

COMPLIANCE FRAMEWORK

Built for Regulated Financial Institutions

- FATF Recommendations
- AML6D Compliant
- ISO/IEC 27001
- SOC 2 Type II
- OFAC SDN Integration
- FinCEN CTR/SAR Ready
- Basel IV Aligned
- PEP Screening

TECH STACK

Enterprise Architecture

Frontend	React 18 + TailwindCSS
Backend	Python FastAPI
Database	MongoDB
AI Engine	OpenAI GPT-4o
Graphs	ReactFlow v11
Charts	Recharts

> *Nexus has transformed how our compliance team handles AML investigations. The AI-generated SAR narratives alone save each analyst 3–4 hours per week, and the Graph Intelligence module surfaced a sanctions network we would have missed entirely with our previous tooling.*
